

STERLING WIND™ PROSPECTIVE PRODUCT CONTENT LABEL

NEW RENEWABLE ENERGY CERTIFICATES¹

This is a renewable certificate product. For every unit of renewable electricity generated, an equivalent amount of renewable certificates is produced. The purchase of renewable certificates supports renewable electricity generation, which helps offset conventional electricity generation in the region where the renewable generator is located. You will continue to receive a separate electricity bill from your utility (if applicable).

These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the RECs you purchased.

Energy Sources		This Offer	Generation Location
	Wind		100%
Biomass			
Geothermal			
Eligible Hydroelectric ³			
Solar			
Total Renewables		100%	United States

This is a REC product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity.

For comparison, the current average (2020) mix of energy sources supplying the US includes: Natural Gas (40.3%), Coal (19.3%), Nuclear (19.7%), Oil (<1%), Other Gases (<1%) and Renewables (19.8%). The average American home uses 990 kilowatt-hours of electricity per month. [Source: U.S. Department of Energy/Energy Information Administration]

For questions regarding terms, pricing or product mix, call Sterling Planet at 877 457 7712.

¹ New renewables come from generation facilities that first began commercial operation no more than 15 years ago.
